Message from the Guest Editor

Pediatric rheumatology is closely linked to the field of immunology and the rheumatic diseases often referred to loosely as “autoimmune” conditions. It also includes autoinflammatory monogenic diseases and autoinflammatory multifactorial diseases with complex inheritance. Dramatic advances in our understanding of the nature of inflammation and the possibility of specifically regulating the aberrant immune inflammatory response are revolutionizing the treatment of rheumatic diseases of childhood. Our better understanding of the genetics of rheumatic diseases is pointing the way to therapeutic targeting at an even more fundamental level: the gene. The present Special Issue aims to deepen and broaden the specificity of predictors across pediatric and adolescent rheumatology. We also highlight the need to ensure that research is integral to transitional care pathways.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
