Message from the Guest Editors

Malignant pleural mesothelioma (MPM) is an aggressive neoplasm that develops in the mesothelial cell layer of the pleura. Exposure to asbestos is a well-known cause of MPM. The global incidence of MPM has continuously risen along with widespread industrial use of asbestos. Recent reports have demonstrated that mesothelioma patients with familial aggregation are associated with BAP1 mutation. Recent progress in basic research and clinical practice has demonstrated some crucial evidence relating to molecular pathogenesis and perspectives on potential therapeutic approaches leading to promising treatment.

This issue is designed to provide a state-of-the-art overview of recent scientific research on mesothelioma, including pathogenesis, diagnosis, and management of MPM.

This Issue will identify the unmet needs in the diagnosis and management of MPM based on a combination of original research and review papers.

Topics will include:

- The pathogenesis of MPM;
- The challenge in the diagnosis of MPM;
- The role of surgery in the treatment of MPM;
- The paradigm shift of systemic therapy of MPM;
- Supportive care in MPM.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
