Message from the Guest Editor

This Special Issue aims to focus on the recent advances in rehabilitation. Rehabilitation generally aims to "add life to years" by helping patients with impairment to achieve and utilize their full physical, mental and social potential. However, recent growing evidence suggests that rehabilitation for patients with visceral impairment such as renal, cardiac and pulmonary impairment can not only improve exercise performance and health-related quality of life but also increases survival. Therefore, rehabilitation for patients does not simply aim to "add life to years" but to "add life to years and years to life", which is a new rehabilitation concept.

We are soliciting such cutting-edge research reports and overviews, both basic and clinical, in relation to rehabilitation, to offer a promising model for the new field of rehabilitation.

Prof. Dr. Masahiro Kohzuki

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
