Message from the Guest Editor

Dear Colleagues,

The pancreas is an organ which plays an essential role in converting the food we eat into fuel for the body's cells. The pancreas has exocrine and endocrine functions. Pancreas diseases are frequent, and prognosis is linked to its aetiology—as an example, localised pancreatic adenocarcinoma justified surgery, where intraductal papillary mucinous neoplasm has no wearisome features. Recent updates in diagnosis imaging help to identify pancreas diseases.

In the Special Issue, we stress a focus on updates of pancreatic disease including adenocarcinoma, intraductal papillary mucinous neoplasm, mucinous cystic neoplasm, serous cystic neoplasm and pancreatitis. The Special Issue will take into account the clinical, surgical, radiological improvements in pancreatic diseases.

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
