Message from the Guest Editors

Interstitial lung disease (ILD) is characterized by an admixture of fibrosis and inflammation infiltrating the interstitium of the lung in a diffuse fashion. There are many different causes of ILD, the more common and severe of which are characterized mostly by fibrosis. Idiopathic pulmonary fibrosis (IPF) is the most common of the fibrotic ILDs and carries a prognosis that is worse than many forms of cancer. The diagnostic and treatment paradigm of IPF and other fibrotic ILDs continues to evolve. Making an accurate diagnosis of IPF can be challenging and often requires a multidisciplinary approach. The advent of antifibrotic therapy over the past decade has changed the landscape of therapy for IPF and appears to have altered the natural disease course. Recent data suggest that pulmonary hypertension, a common complication, might be a viable target for therapy when it supervenes in IPF and other ILDs. The aim of this Special Issue is to highlight and contextualize some of these recent advances in the field of pulmonary fibrosis.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
