Message from the Guest Editor

Dear Colleagues,

Type 2 diabetes and its complications are among the most important health problems in the world. Nowadays, it is widely recognized that type 2 diabetes is associated not only with cardiovascular mortality, but also with poor quality of life due, for example, to chronic kidney disease, sarcopenia, cancer, and dementia. To overcome these problems, it is important to better understand the disease process of type 2 diabetes and its complications with the goal of developing new treatment strategies.

This Special Issue of the *Journal of Clinical Medicine* aims to invite authors to contribute original research articles as well as review articles related to the pathophysiology and treatment of type 2 diabetes and its vascular and non-vascular complications.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
