Message from the Guest Editor

Dear Colleagues,

Rheumatology is a constantly evolving discipline. The prognosis of many rheumatologic diseases has greatly improved as a result of substantial progress in disease management, even though their pathogenetic aspects, both genetic and environmental, remain unresolved. Unfortunately, the new treatments do not appear to decrease the incidence of some potentially life-threatening complications, such as macrophage activation syndrome and interstitial lung diseases in systemic-onset juvenile idiopathic arthritis/still disease. Therefore, the understanding of immune dysregulation underlying these pathologies is relevant to identifying biomarkers for their early identification. However, the risk/benefit profile of the new therapeutic agents in real-world rheumatology practice deserves further investigation and surveillance.

The present topic aims to collect original contributions that represent novel insights into rheumatologic/autoinflammatory disease pathology and clinical treatment of both adults and children, in order to offer the scientific community knowledge and actionable suggestions for clinical practice.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
