Deadline for manuscript submissions:

closed (10 July 2023)

Message from the Guest Editors

Airway management and respiratory therapy are clinical events and problems that anesthesiologists have to deal with everyday. Clinical guidelines and expert consensus have been increasingly issued and updated in this field in past decades, although anesthesiologists still complain that they have not achieved satisfactory outcomes in clinical practices, and often need to face a dilemma from clinical decision-making. How to manage the airway safely and implement appropriate and effective respiratory treatment is an important clinical problem that anesthesiologists need to consider, since it will endanger the life of patients and safety perioperatively. In addition, difficult airways, muscle relaxants, and patients with special ENT surgery and emergency surgery have brought great challenges to anesthesiologists in implementing appropriate airway management and respiratory therapy. More importantly, clinical findings from evidence-based medicine and large-scale real-world studies have negatively impacted empirical medicine, guidelines, and expert consensus. The time delay do cause a failure in research results and findings to be updated and introduced to the anesthesiologists in time.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
