Message from the Guest Editor

Demyelinating disease refers to any condition that causes damage to the protective covering (myelin sheath) that surrounds nerve fibers in the brain, the nerves leading to the eyes (optic nerves), and the spinal cord. When the myelin sheath is damaged, nerve impulses slow or even stop, causing neurological problems.

There is no cure for demyelinating diseases, but disease-modifying therapies can alter disease progression in some patients. Disease-modifying therapies can be used together with symptomatic treatment. The symptoms and progression of demyelinating diseases vary between patients. Early diagnosis and the discussion of treatment options are important.

In this Special Issue, we will focus on the recent progress in the diagnosis and treatment of demyelinating diseases, such as multiple sclerosis (MS), acute-disseminated encephalomyelitis (ADEM), and acute hemorrhagic leucoencephalitis (AHL). Any original research articles and reviews are welcome.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
