Message from the Guest Editor

Dear Colleagues,

Despite enormous advances in kidney transplant techniques in recent decades, kidney transplant recipients frequently develop transplantation-associated health issues that have to be managed in clinical routine by transplant physicians every day. Clinical complications range from surgical issues over metabolic and cardiovascular disorders to infections and cancer. Moreover, we have to handle adverse effects of immunosuppressive agents as well as a re-occurrence of the underlying kidney disease. Unfortunately, complications may start early after (e.g., new onset of diabetes mellitus, infections, and rejections) or even during transplantation (such as hemorrhage), but some need to be taken care of especially at late stages (e.g., malignancy, interstitial fibrosis and tubular atrophy, and cardiovascular events).

In this Special Issue we will address the whole spectrum of clinically relevant complications that occur in kidney transplant recipients. As complications directly impact on the health and the outcome of transplant recipients, this Special Issue should increase the awareness as well as the knowledge of transplant physicians and researchers to these issues.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
