Deadline for manuscript submissions:

closed (10 December 2018)

Message from the Guest Editor

It is no longer acceptable to lump lung cancer into either small cell or non-small cell groups. With the advent of targeted therapy for cancers with mutations or rearrangements, and the increasing role for immunotherapy, there is an increasing need for precise pathology assessment and individualized therapy. This is an exciting time in lung cancer care, but these developments also require clinicians involved in lung cancer to be up to date with all new developments. Hopefully this Special Issue will assist clinicians in being aware of state-of-the-art lung cancer care.

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
