### Message from the Guest Editors

Dear Colleagues,

Over the last few years, oral and maxillofacial surgery (OMFS) has seen significant improvements in the medical and dental fields. In recent years, clinicians and researchers have made several significant changes in every aspect of OMFS from diagnosis to treatment. In particular, the synergy between oral surgery, maxillofacial surgery and oral pathology plays a role of primary importance in the management of patients with oro-maxillary problems. Recently, the attention of the research has been focused on new therapeutic and diagnostic approaches in the management of diseases of the oral cavity, on innovative surgical techniques for the rehabilitation of atrophic jaws, on the use of new procedures of hard and soft tissues regeneration and on the virtual surgical planning. For this reason, the therapeutic–diagnostic approach requires an important effort by researchers and health professionals. For this Special Issue on "Breakthroughs Oral and Maxillofacial Surgery" we invite you to submit proposals in every field of research on innovation in oral and maxillofacial surgery.

an Open Access Journal by MDPI

## Message from the Editorial Board

*Journal of Clinical Medicine* (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
