Message from the Guest Editors

Dear Colleagues,

Advances in immunosuppression and kidney transplant techniques have led to significant improvements in the short-term survival of the renal allograft. Long-term graft survival, however, has relatively lagged behind and has now become one of the main problems in kidney transplantation.

In this Special Issue, we are making a call to action to stimulate researchers and clinicians to submit their invaluable studies on kidney transplantation, including works on issues related to donors, allograft, and patient survival following transplantation that will provide additional knowledge and skills in the field of transplantation research, ultimately to improve outcomes after kidney transplantation. Original investigations, review articles, and short communications are especially welcome.

Potential topics include, but are not limited to, the following:

ABO-Incompatible Kidney Transplant Outcomes
Advances in Renal Transplant Immunosuppression
Advances in Kidney Procurement and Transplantation
Antibody-Mediated Rejection: New Approaches to Prevention and Management
APOL1 Genotype and Kidney Transplantation Outcomes
...

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
