Message from the Guest Editors

Despite multiple efforts, periprosthetic joint infections remain one of the most devastating complications in arthroplasty surgery. However, modern diagnostic and therapeutical approaches manage to get a better and in-depth understanding of both the mechanisms of treatment success and also their failures. The aim of this Special Issue is to highlight these approaches and to offer interested readers knowledge and solutions for PJI management. Next to the presentation of algorithms which are vital for treatment successes, a focus of the Special Issue will also be the reporting and evaluation of new methods identified in basic research and, if advanced, translated to patient care.

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
