Message from the Collection Editor

Dear Colleagues,

Irritable bowel syndrome (IBS) is a frequently encountered daily condition in clinical practice, yet we are still quite uninformed on many aspects—both pathophysiological and therapeutic—of this syndrome. The recent Rome criteria raised some controversial issues, and there are several pathophysiological studies exploring the possible basic mechanisms of this condition. Additionally, the pharmacological research is quite active in this field, and several new options are now available for IBS patients, in addition to those in the pipeline for the coming years. This Special Issue aims to present the latest research in the IBS field, from physiological, pathophysiological, and therapeutic points of view, to provide recent insights into this fascinating entity.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
