Message from the Guest Editor

Dear Colleagues,

The associations between traumatic life events and the risk for psychosis have been repeatedly demonstrated in a variety of studies. A history of traumatic life events also seem to specifically increase risk for psychosis, as the association persists even when controlling for comorbid psychological symptoms. In this Special Issue, we will focus on recent advances in understanding the relationship between trauma and psychosis, including epidemiologic, psychosocial, and biological evidence that will help us understand the trauma-psychosis association. In attempting to understand this association, we will explore the relationship between trauma and the full continuum of psychosis, from psychotic-like experiences to psychotic disorder diagnoses.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
