Message from the Guest Editor

Urology has always been at the forefront of surgical innovation. In past years, new technologies and surgical approaches, minimally invasive techniques, laparoscopic frontier, robotic and digital surgery/platforms, were introduced that radically changed the management of urological disorders, improving patient outcomes.

This Special Issue aims to publish contributions from distinguished authors who actively experience innovations in the field of urological surgery and want to provide more solid scientific evidence. All researchers are invited to contribute original articles and reviews (A special discount for you).

(**Note:** Animal research, case reports and short reviews are not accepted).
