Message from the Guest Editor

Dear Colleagues,

Vitreo-retinal disorders are among the leading causes of visual impairment and blindness worldwide. Recently, their pathogenesis has been investigated by clinical and basic studies using advanced imaging analyses and genome analyses. Their diagnosis has changed through recently proposed classifications. New drugs under development and newly proposed surgical techniques will also change the treatment method and regimen for vitreo-retinal disorders. This Special Issue will address the most recent findings on vitreo-retinal disorders and review their pathogenesis, diagnosis, and therapies.

Prof. Kenji Yamashiro

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
