Clinical Advances in Spinal Neurosurgery

Message from the Guest Editor

Spinal neurosurgery continues to evolve, with the goal of improving both surgical techniques and patient outcomes. While minimally invasive approaches—including lateral, anterior, and endoscopic spine surgery—have revolutionized treatment by reducing morbidity and enhancing recovery, there remains a critical need for better ways to assess functional outcomes, patient satisfaction, and long-term success. Emerging perioperative strategies, advanced imaging modalities, and refined outcome measures are playing a pivotal role in optimizing surgical decision-making and postoperative care. This Special Issue welcomes original research, clinical studies, and reviews on the latest innovations in spinal neurosurgery, with a focus on novel surgical techniques, enhanced recovery pathways, and improved methods for measuring patient outcomes. We encourage contributions exploring minimally invasive spine surgery, advanced perioperative assessment tools, patient-reported outcome measures, and objective functional metrics that enhance our understanding of post-surgical recovery.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
