

Special Issue

New Challenges in Laparoscopic, Robotic and Endoscopic Surgery

Message from the Guest Editor

Laparoscopic, robotic, and endoscopic surgery have revolutionized surgery by enabling minimally invasive procedures. This Special Issue focuses on the latest advancements in these areas, exploring surgical procedures, techniques, and outcomes. It aims to provide insights into the evolving landscape of minimally invasive surgery and address the complexities faced by surgeons. Laparoscopic surgery presents challenges due to limited depth perception and instrument motion. Surgeons work with two-dimensional images and manipulate instruments from a distance, adding complexity to delicate procedures. Robotic surgery offers enhanced dexterity and precision but faces obstacles like high costs and specialized training, making it less accessible. Endoscopic surgery poses challenges related to visualization and access, often relying on indirect techniques that can increase complications. Overall, while laparoscopic, robotic, and endoscopic surgery have transformed the field of surgery, there are still ongoing challenges that need to be addressed to further enhance patient care and surgical outcomes.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
