Rhinosinusitis and Nasal Polyposis: Patophysiology, Diagnosis and Treatment

Message from the Guest Editors

Rhinosinusitis and nasal polyposis are highly prevalent upper airway conditions that significantly impact patient quality of life. In recent years, there has been growing interest in advancing the understanding and management of these complex disorders. This Special Issue aims to provide a platform for clinicians and researchers to share the latest evidence-based knowledge in this field. We invite submissions of original research articles and systematic reviews that focus on evidence-based practices in the management of these conditions. This Special Issue seeks to explore various areas, including diagnostic approaches and therapeutic interventions. Authors are encouraged to present studies that investigate the efficacy and safety of medical treatments, such as corticosteroids, antibiotics, and biologics, as well as surgical interventions, including endoscopic sinus surgery and polypectomy. We also encourage the exploration of emerging diagnostic techniques that can aid in accurate diagnosis and disease monitoring. We sincerely look forward to receiving your contributions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
