

Special Issue

Clinical Diagnosis of Lung Cancer

Message from the Guest Editors

Accurate and timely diagnosis is critical for the effective management of lung cancer, the leading cause of cancer-related mortality worldwide. This Special Issue of the *Journal of Clinical Medicine* will provide an overview of the latest developments in the clinical diagnosis of lung cancer. We welcome original research and comprehensive reviews that showcase recent advances across the continuum of lung cancer diagnosis—from screening and early detection to molecular testing and biomarker discovery. Key topics to be covered include the implementation of lung cancer screening programs, the comparative effectiveness of different imaging modalities, innovations in endoscopic techniques and minimally invasive staging, the role of liquid biopsies, and the validation of emerging molecular biomarkers. This issue aims to promote multidisciplinary collaboration and the adoption of best practices. The goal is to achieve earlier diagnosis, more accurate subtyping, and improved staging. The insights presented may aid clinicians in selecting optimal treatment approaches and personalized monitoring strategies.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
