New Challenges in Dental Implants

Message from the Guest Editors

Dental implants are a reliable option to replace missing teeth. Due to the recent development in biomaterials and dental implant surfaces, a variety of treatment options can be offered to patients. In addition, advances in prosthodontic and surgical techniques, such as immediate loading, have expanded the treatment possibilities and broadened the range of patients that may benefit from dental implant treatments. Advances in materials science, including in graft materials, and dental implant surfaces, such as digital implant planning, facilitate daily practice and improve treatment outcomes. However, all of these new possibilities caused dental implant treatments to be challenging. New research and developments are required to ensure an evidence-based treatment. For this Special Issue, we would like to invite clinicians and researchers to submit original research in terms of innovations in dental implant science. **Keywords:** dental implants; biomaterials; digital planning; soft tissue; bone graft; clinical protocol; immediate loading

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
