Aortic Aneurysms: Recent Advances in Diagnosis and Treatment

Message from the Guest Editors

Thoraco-abdominal aortic aneurysms (TAAAs) are associated with high morbidity and mortality if not treated in a timely and appropriate manner.

Endovascular treatment of TAAAs is now considered the gold standard due to its short operative time, reduced invasiveness and low mortality. However, several issues are still under debate, such as the risk of spinal cord ischemia, the choice of appropriate grafts and long-term outcomes, which require new robust data on new materials to be added to the literature. In particular, the use of physician-modified grafts to address complex aortic anatomies not amenable to off-the-shelf treatment needs to be investigated. In addition, improving standards of adjunctive medical treatment and perioperative management is key to achieving better outcomes and standardizing treatment. This Special Issue focuses on current advanced and new treatment options for thoraco-abdominal aortic aneurysms. Therefore, we welcome the submissions of innovative, original research and in-depth review articles dealing with pioneering management and/or treatment techniques for TAAAs.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
