Transjugular Intrahepatic Portosystemic Shunt: Challenges and Perspectives

Message from the Guest Editors

Transjugular intrahepatic portosystemic shunts have been part of the therapeutic armamentarium for the resolution of complications related to portal hypertension for years. At first, its use was limited to patients with relapsed esophagogastric variceal hemorrhage or refractory ascites, but over the years, the indications have changed regarding the timing of the procedure, and it has also been extended to other indications, such as congestive transfusion-dependent gastropathy despite standard medical and endoscopic therapy, Budd Chiari syndrome, and portal vein recanalization in the case of portal thrombosis, and it has also been used in selected cases of non-cirrhotic portal hypertension. The aim of this collection will be to provide a systematic and critical analysis of the state of the art, of the gray areas, and of the challenges and the treatment prospects of this procedure.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2024).
