New Insights into Diabetic Foot

Message from the Guest Editors

Diabetic foot disease (DFD) is a clinical, social, and economic burden. It has been documented that 19–34% of persons with diabetes can develop a foot ulcer during their lifetime.

Despite significant reductions in major amputations over the past two decades, diabetic foot disease (DFD) continues to pose a substantial challenge for clinicians. Key areas of concern include neuropathy-induced disability, untreatable lower limb ischemia, the management of diabetic foot osteomyelitis, Charcot foot, advanced wound care, regenerative therapy, ulcer recurrence, and patient frailty. These issues represent crucial areas to improve our understanding, with the ultimate aim to minimize avoidable amputations and enhance patients' quality of life.

This Special Issue is dedicated to all clinicians and researchers involved in diabetes and diabetic foot care. It aims to present the current state of the art in DFD management and to explore potential future therapeutic and research avenues that could aid healthcare professionals. Its focus spans various disciplines, including endocrinology, neurology, and vascular and orthopedic surgery, as well as those in general medicine.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
