

Special Issue

Thoracic Surgery: Current and Future Strategies

Message from the Guest Editors

Thoracic surgery has acquired considerable innovations in recent years. New technologies and surgical approaches have radically changed the management of several thoracic diseases, from diagnosis to radical therapy. Sublobar lung resections have become increasingly popular in recent years, along with the development of new technologies such as virtual-assisted lung mapping and 3D reconstructions. Video-assisted thoracoscopic surgery (VATS) and robotic-assisted thoracic surgery (RATS) have proved to be oncologically appropriate, ensuring excellent patient outcomes. In addition, medical therapies have also made significant progress (new drugs, immunotherapy, targeted therapy), becoming more and more targeted to the patient. This has led to the development of new surgical scenarios as part of a multidisciplinary pathway. This Special Issue of the Journal of Clinical Medicine aims to publish contributions from distinguished authors with active experience of innovation in the field of thoracic surgery who wish to provide more solid scientific evidence. All researchers are invited to contribute original works and reviews.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
