New Clinical Insight on Degenerative Cervical Spine Disorder Treatment

Message from the Guest Editors

Degenerative cervical spine disorders (DCSD) are common diseases in spinal surgery clinics and often contribute to the instability, deformity, and stenosis of the spinal segment and even neurological dysfunction. Currently, the most effective treatment for DCSD patients is decompression surgery with or without internal fixation. Minimally invasive cervical surgery is being performed today with the help of endoscopic or working channels. The non-fusion technique (artificial cervical disc replacement, ACDR) focusing on spinal function reconstruction has also been reported with increasing success. Additionally, standardized and scientific perioperative management is gathering increasing interest. Taken together, an update of surgical techniques and improvements to perioperative management strategies will be helpful in the postoperative rehabilitation of DCSD patients. In this Special Issue, we solicit original research articles and review articles focusing on the surgical treatment and/or perioperative management of DCSD. We hope this proposal can help foster a standardized surgical treatment and perioperative management of DCSD.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
