Joint Arthroplasty: Current Status, Challenges, and Future Directions

Message from the Guest Editor

Total joint arthroplasty procedures are among the most prevalent and utilized surgeries in modern medicine, improving pain and function for millions of patients annually. Populations undergoing total joint arthroplasty are increasingly comorbid, thus highlighting the importance of preoperative optimization and evidence-based recovery pathways. The periprosthetic joint infection continues to be a leading cause of failure, with significant associated morbidity, mortality, and cost. Finally, patients expect higher levels of post-operative function. This has sparked interest in alternative concepts of lower extremity alignment about the knee, spinopelvic mechanics in the hip, and the rapid development of new implants and technologies to enable these concepts. By understanding the current state of the art and challenges in joint arthroplasty, future options may offer safer, higher-functioning joint replacements for patients. Therefore, we welcome the submission of original research papers dealing with the topics of arthroplasty.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
