Rehabilitation Strategies for Neurological Disorders: Advances and Insights

Message from the Guest Editors

Neurologic disorders lead to disability through motor, cognitive, and sensory impairments, impacting patients' independence and economic self-sufficiency.

Rehabilitation medicine aims to enable people with impairments and activity limitations to reach and maintain optimal functioning in physical, intellectual, psychological, and/or social domains. The patient's assessment and the goal-setting process are essential for an individualized neurorehabilitation plan to reduce disability, develop new skills, and adjust behaviors and environments to enhance participation. Increasing evidence suggests that intensive and repeated practice is essential to modify neural organization and facilitate the reacquisition or relearning of motor skills. In this Special Issue, we welcome authors to submit papers on advanced therapy strategies and concepts for rehabilitation after a neurological disease. These methods aim to boost neuroplasticity and include botulinum toxin, conventional therapy, and advanced technologies, such as robotics, virtual and augmented reality, and artificial intelligence techniques.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
