Personalized Therapy and Clinical Outcome for Heart Valves

Message from the Guest Editors

With advanced medical technology, the treatment of heart valves has revolutionized. A range of innovative, minimally invasive procedures have been developed, such as transcatheter aortic valve replacement (TAVR), anticoagulation management, minimally invasive procedures, imaging technologies, percutaneous mitral valve repair (MitraClip) and robotic mitral valve repair. New techniques have improved the survival and quality of life of formerly untreatable patients. But there are still some challenges that require clinicians and researchers to continue and promote the clinical management of heart valves. The primary goals of this Special Issue are to improve the personalized therapy and clinical outcomes for those with heart valve problems. We look forward to your enthusiastic participation in this Special Issue that will promote scientific communication, with the ultimate goal of positively influencing the treatment and care of patients.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
