

Special Issue

Translational Immunology in Clinical Medicine: From Preclinical Insights to Therapeutic Impact

Message from the Guest Editor

This Special Issue will explore how advances in immunology are being translated into clinical practice, with a focus on immune-mediated diseases including autoimmune conditions, autoinflammatory syndromes, and cancers.

We welcome contributions that emphasize the clinical application of immunological insights. Studies should clearly demonstrate relevance to patient care, highlighting how immune mechanisms inform diagnostic decisions, therapeutic choices, or safety management.

Submissions may also include translational studies that bridge laboratory models with clinical data, provided they offer a direct line of sight to clinical utility. Humanized or patient-derived models, studies of immune-related adverse events, and analyses of immune signatures predictive of response or toxicity are especially encouraged.

By focusing on clinically meaningful immunology, this Special Issue aims to foster dialogue across disciplines and accelerate the integration of immune science into everyday medical practice. Please click [here](#) to find more information

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
