

Special Issue

Clinical Challenges in Endocarditis—2nd Edition

Message from the Guest Editor

I am pleased to invite you to contribute to this Special Issue entitled “Clinical Challenges in Endocarditis—2nd Edition”. For more details on the first volume, in which we published four papers, please visit https://www.mdpi.com/journal/jcm/special_issues/Clinical_Endocarditis

Infectious endocarditis (IE) is a fatal and debilitating disease, and has been a growing problem in the last decade. IE more frequently affects men of around 60 years of age, with staphylococcal and enterococcal IE being the most frequent. Oral streptococcal endocarditis is less frequent, and its incidence has not increased since the implementation of the 2009 and 2015 recommendations restricting indications for antibiotic prophylaxis. There has been considerable focus on new methods of early diagnosis, such as PET or CT scans, which are now used in several countries. The prognosis of IE is still unacceptably poor, and more aggressive management of this deadly disease remains necessary. For this Special Issue, we encourage the submission of studies that investigate clinical challenges involving IE.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
