Latest Research on Male Infertility

Message from the Guest Editor

Male factor issues are responsible for 50% of a couple's infertility. Male infertility is emerging as an important cause of infertility worldwide, and recent research has improved our understanding of the sperm's contribution to fertilization and embryo development. New insights into sperm function and fertilization have been uncovered, emphasizing the need for breakthroughs to assist sperm during successful fertilization. This involves understanding the sperm's ability to navigate the female reproductive tract and overcome biological barriers. Continued research in these areas promises to improve diagnostic and treatment options for affected individuals. This Special Issue on "Latest Research on Male Infertility" will feature the articles related to male reproductive research advancements, with insights identified at the molecular level. For this Special Issue, we invite you and your colleagues to submit an original research article or comprehensive review article related to this field.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
