Endometriosis: Clinical Diagnosis and Treatments

Message from the Guest Editors

In many cases, the diagnosis and treatment of endometriosis represent challenges for clinicians, particularly in cases of deep infiltrating endometriosis or extragenital endometriosis. The risks and diagnostic limitations of surgery and the inaccuracy of clinical examination justify the considerable efforts made to improve the diagnosis with imaging techniques. Additionally, treatment is frequently controversial, despite the availability of several clinical guidelines for endometriosis diagnosis and therapy. The therapeutic approach actually focuses on the management of symptoms related to endometriosis, without specifically addressing the root causes of the disease. Moreover, for infertile patients, medical therapy has a limited role. Given all the above-mentioned considerations, the aim of this Special Issue is to provide a comprehensive overview of the advances in the diagnosis and treatment of endometriosis. Researchers in the field of endometriosis are encouraged to submit their findings to this Special Issue in the form of original articles or reviews.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
