## Special Issue

# Intrarenal Surgery for Kidney Stones and Other Kidney Diseases

## Message from the Guest Editor

Intrarenal surgery is an evolving landscape that encompasses both established and novel approaches to the management of kidney stones and other renal pathologies. Recent advances in endourology have included novel lasers; thinner flexible ureteroscopes, most of which are single-use; miniaturized percutaneous nephrolithotomy; and novel accessory instruments such as flexible and navigable access sheaths or automated platforms that incorporate artificial intelligence to regulate irrigation and suction for enhanced visibility and safety. All of these developments have significantly enhanced surgical efficacy, reduced morbidity, and expanded the indications for minimally invasive interventions. Beyond lithiasis, intrarenal surgery is increasingly applied to the management of other pathologies such as urothelial tumors or congenital abnormalities. The integration of these new devices and techniques is transforming standards and the outcome of procedures. This Special Issue welcomes the submission of original research and clinical perspectives on operative techniques, outcome metrics, complication management, and future innovations in intrarenal surgery.

## **About the Journal**

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## **Editors-in-Chief**

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

## **Author Benefits**

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

## Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

## **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
