Clinical Diagnostics and Therapeutics Advances in Acute and Chronic Heart Failure

Message from the Guest Editors

Heart failure (HF) remains a popular topic of discussion and an area of significant interest within the cardiovascular community due to its growing prevalence and the substantial burden it places on healthcare systems worldwide. Despite advancements in diagnostic and therapeutic strategies, many aspects of HF management remain underexplored, particularly the "gray zones", where clinical decisions are complex and nuanced. Moreover, worsening and advanced HF are still underdiagnosed conditions, with their management often varying from center to center, and lacking common guidelines both in terms of management and pharmacotherapy. In this regard, this Special Issue delves into these areas, offering insights from real-life evidence and addressing the multifaceted challenges faced by clinicians. We aim to bridge the gap between clinical trial data and everyday practice, providing a comprehensive overview of contemporary issues in HF management. This issue seeks to foster a deeper understanding of HF, ultimately improving patient outcomes and advancing the field.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
