

## Special Issue

# Therapeutic Innovations in the Management of Patients with Atrial Fibrillation

### Message from the Guest Editor

This Special Issue of Journal of Clinical Medicine has as its main objective to synthesize papers focused on the comprehensive management of atrial fibrillation. Special emphasis will be placed on individualizing the upcoming therapeutic innovations in this field to individual patient needs, and on identifying knowledge gaps to stimulate future research. Original investigations, review articles, and short communications are welcome. Case reports will not be considered.

In summary, this Special Issue aims to place therapeutic innovations in the perspective of individualistic care of patients with atrial fibrillation. Potential topics include but are not limited to the following:

- Anticoagulation;
- Refining stroke risk algorithms;
- Gender- and ethnicity-specific demographics;
- Use of digital technology for early diagnosis and monitoring;
- Risk factor modification;
- Anti-arrhythmic medications;
- Advances in catheter ablation of atrial fibrillation.
