Special Issue

Advances in Kidney Transplantation

Message from the Guest Editors

The medical practice is moving toward precision medicine in the field of renal transplantation. Advancements in our understanding of the pathophysiology of graft rejection and other post-transplant complications have enabled the identification of implications in clinical features, the development of precise diagnostic methods and targeted therapies, and the accurate prediction of prognosis. Research on biomarkers has revealed new indicators for monitoring graft function and the early detection of rejection and subclinical graft inflammation. These biomarkers are being used as diagnostic tools and therapeutic targets, significantly improving post-transplant outcomes. All these efforts have improved the clinician's approach to diagnosis, treatment, and prognosis prediction in renal transplantation. The aim of this Special Issue is to highlight recent advances in the context of diagnosis, treatment, and prognosis prediction in renal transplantation, emphasizing how these developments are improving long-term outcomes for transplant recipients.

20 August 2025

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès
Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi
Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:
indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:
JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
