

Special Issue

Targeted Diagnosis, Physiotherapy, and Rehabilitation of Tailored Management Sport Injuries

Message from the Guest Editors

Dear colleagues, This Special Issue focuses on targeted diagnosis, physiotherapy, and rehabilitation approaches for sports injuries. It covers a range of topics, from standard diagnosis techniques to the latest breakthroughs in technology-driven solutions. The issue offers a multidisciplinary approach, with experts from various fields contributing to developing targeted physiotherapy and rehabilitation protocols. It will also help identify risk factors that lead to specific injuries and offer suggestions regarding managing these risks to prevent future injuries. Overall, this Special Issue offers evidence-based approaches to the diagnosis, physiotherapy, and rehabilitation of sports injuries, accounting for biopsychosocial considerations and the latest techniques and technologies. Best regards, Please click [here](#) to find more information

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
