Treatment of Bladder Cancer: From Past to Future

Message from the Guest Editor

Bladder cancer is a frequent cancer type with a high degree of diversity regarding its prognosis and treatment modalities. The incidence of bladder cancer has been almost unaltered over the past decades despite the focus on smoking and work environmental improvements. Thus, the reduction in these factors has been upweighted by an increasing life expectancy in the Western World. During the last decade, previous stagnation in the development of new treatment modalities has changed into an explosion of new local and systemic treatments. Immunotherapy showed promising results when introduced, but the initial enthusiasm was quickly changed to a more realistic expectation of a game changer in just a minority of patients; however, this fact has paved the way for more individualized tailor-made treatments. We are on the verge of a new future for bladder cancer treatments. With this Special Issue, we hope to focus on an up-to-date mapping of the current status of bladder cancer and highlight new promising fields of diagnostics, treatments, and follow-ups.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
