

## Special Issue

# Gastric Bypass Surgery: Current Challenges and Future Perspectives

### Message from the Guest Editor

Roux-Y gastric bypass (RYGB) remains one of the three most frequently performed bariatric operations worldwide. Scarce evidence suggests that RYGB, as compared to sleeve gastrectomy, has more durable results in terms of weight loss in the long term. RYGB is regarded as a procedure of choice for bariatric patients with Barrett's esophagus, severe gastro-esophageal reflux disease, and hiatal hernia, both in primary and redo scenarios. It is also a common revisional operation for weight regain after sleeve gastrectomy, but also after gastric banding or vertical banded gastroplasty. RYGB plays an important role as a rescue procedure in case of complications of sleeve gastrectomy, but also complications of single-anastomosis gastric bypass. The scope of this Special Issue concentrates on three issues:

- Long-term (10+ years) results of RYGB compared to sleeve gastrectomy.
- Bowel obstruction after RYGB in the long term: how serious is the problem and could it be prevented?
- Chronic pain after RYGB: how to diagnose, prevent, and manage patients?

---

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
