Clinical Management of Allergic and Inflammatory Skin Diseases: A Diagnostic and Therapeutic Perspective

Message from the Guest Editors

Dermatology has advanced significantly in the past, especially in allergic and inflammatory skin diseases. Skin, as one of the largest immune organs, has made remarkable progress in the treatment and diagnosis of the inflammatory skin diseases, such as psoriasis, atopic dermatitis, acne, bullous diseases, and hidradenitis suppurativa. However, many studies have shown that severe inflammatory skin diseases are closely related to systemic complications, such as arteriosclerosis, cardiovascular disease, abnormal fat metabolism, nephrosclerosis, and systemic amyloidosis. Therefore, timely diagnosis and precision medicine are particularly important for patients, and we still need a lot of research work. We welcome papers involving clinical evidence, as well as the application of novel diagnostic techniques, that may improve our understanding and management of patients affected by inflammatory disease of the skin.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
