Special Issue

Anterior Cruciate Ligament Reconstruction: Clinical Advances and Prognosis

Message from the Guest Editors

ACLR remains one of the most common surgical interventions in orthopedics and sports medicine. There is a continuous need for the evolution and improvement of existing techniques. Furthermore, there is still a lot of controversy regarding the ideal graft, while novel techniques have emerged, such as the all-inside repair technique or the utilization of scaffolds to enhance local biology, in an attempt to achieve better outcomes. The possibility of functional instead of surgical repair, graft choice, fixation of the graft, concomitant injuries and their management, and complications following reconstruction are some of the issues that orthopaedic surgeons have to face in everyday clinical practice when addressing ACL tears. Lastly, a relatively early but mainly safe return to sports, along with a high rate of patient satisfaction, constitutes a primary objective of ACL reconstruction. The goal of this Special Issue is to provide a comprehensive review of these challenges by collecting papers from an expert panel of authors, with a particular focus on clinical advances and prognosis after ACL reconstruction.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
