Valvular Heart Disease: Challenges and New Opportunities

Message from the Guest Editor

As is well-known, with the aging of the population, the prevalence of acquired valvular heart disease (VHD) is rapidly growing and, today, it is among the most common causes of cardiovascular morbidity and mortality. Furthermore, VHD may significantly affect the patients' well-being and reduce their quality of life. Although several new therapeutical options have been proposed in recent years, there are still important gaps in the understanding of imaging and clinical parameters. With this Special Issue, we seek to provide an overview of the latest advances in the imaging and therapeutic options for patients with VHD with a particular focus on the role of multimodality imaging assessment (including 2D and 3D echocardiography, speckle tracking echocardiography, non-invasive myocardial work assessment, cardiac computed tomography, cardiac magnetic resonance, nuclear imaging and fusion imaging) and imaging markers for risk stratification and outcome prediction in VHD patients. We invite you to participate in this Special Issue.

Guest Editor

Dr. Federico Fortuni

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
