

Special Issue

Progress in Patient Safety and Quality in Maternal–Fetal Medicine

Message from the Guest Editor

This Special Issue aims to compile original research and review articles focused on enhancing patient safety and clinical quality improvement relevant to pregnancy and postpartum care. We welcome submissions on a wide variety of topics related to clinical quality and safety, including but not limited to:

- Medical error;
- Diagnostic error;
- Adverse events;
- Disclosure and reporting;
- Model for improvement;
- Implementation science;
- Health equity;
- Social drivers of health;
- Team building and communication;
- Care handoffs;
- Simulation and drills.

This Special Issue is particularly interested in articles that highlight clinical quality improvement projects and initiatives aimed at enhancing patient safety and quality within maternal–fetal medicine. Authors are encouraged to submit their research and findings related to these topics to contribute to the advancement of patient safety and quality.

Dr. C. Andrew Combs

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
