Special Issue

Clinical Advances in the Surgical Treatment of Spinal Tumors

Message from the Guest Editors

The treatment of spinal tumors (metastatic disease and primary tumors) is challenging for two reasons: the complex spinal anatomy with topographic vicinity of the essential neurovascular, visceral, and pulmonary structures and the obligatory interdisciplinary management that guide patients from their initial diagnosis through the course of the diseases.

This Special Issue of the Journal of Clinical Medicine focuses on latest technical advances in surgical methods and resections for primary and secondary spinal tumors and summarizes the treatment-specific risk and complication profiles, as well as individual outcomes.

- spinal tumors
- spinal sarcoma
- spinal metastasis
- 3D imaging and navigation
- en bloc spondylectomy

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi
