Allergic and Eosinophilic Diseases: Diagnosis, Treatment and Management (Second Edition)

Message from the Guest Editor

Allergic and eosinophilic diseases represent a collection of disorders including bronchial asthma, atopic dermatitis (AD), allergic rhinitis (AR), conjunctivitis, chronic rhinosinusitis with/without nasal polyps (CRSwNP/CRSsNP), food allergy, eosinophilic esophagitis (Eo), and other conditions mediated by eosinophilic inflammation. Allergic/eosinophilic diseases are mediated by T2-driven pathophysiological mechanisms shared across multiple allergic/eosinophilic disorders that often overlap in the same patient. The complexity of allergic/eosinophilic disorders in terms of treatment options and guideline indications highlights the need to identify specific advice to optimize the management of different types of patients who could benefit from the current standard of care medication, prevention strategies (allergen immunotherapy), or biological therapy. This Special Issue aims to discuss new knowledge in clinical allergic/eosinophilic disorders in terms of diagnosis, treatment, and management and welcomes inputs from researchers in different disciplines who feel they can contribute to this discussion.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
