

## Special Issue

# Hepatobiliary and Pancreatic (HPB) Surgery: Current Status and Future Perspectives

### Message from the Guest Editors

Hepatobiliary and pancreatic (HPB) surgery is used to treat various diseases, ranging from benign conditions to primary and secondary neoplasms. We invite you to submit a paper to this Special Issue, which will explore the most recent progress regarding HPB surgery. Both clinical and technological evolutions will be considered with the option of including narrative and systematic reviews, meta-analysis, research articles and case reports of particular interest or exceptional didactical value. "Hepatobiliary and Pancreatic (HPB) Surgery: Current Status and Future Perspectives" will give specialists involved in the care of HPB surgical patients the opportunity to share their experiences or points of view on several relevant topics, with the primary aim being improving global knowledge and patient outcomes. We look forward to receiving your contributions.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
