Therapeutic Advancements in Psoriasis and Psoriatic Arthritis

Message from the Guest Editors

In recent years, many advances in science have provided a better understanding of the pathogenesis of psoriasis and psoriatic arthritis. This facilitated the identification of many new therapeutic targets, such as those blocking the main pro-inflammatory cytokines involved in the pathogenesis of this disease. Research has particularly focused on systemic agents for the treatment of moderate-to-severe psoriasis and psoriatic arthritis, particularly with the introduction of biological agents and "small molecules". Treatment selection for psoriasis and psoriatic arthritis may be challenging and different factors have to be considered when choosing the right treatment for the right patient at the right time. For this Special Issue, we invite authors to present articles on therapeutic advances in the treatment of psoriasis and psoriatic arthritis, including both data trials and real-life experiences.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
